

Project management

Biomass powered district heating system in the town of Solčava

Location

Solčava - Logarska valley, Slovenia

Investment value

1.200.000,00 €

Year(s)

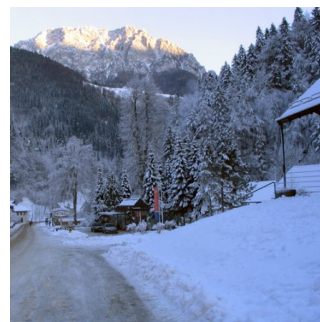

2000 - 2002

Services

basic design,
building permit design,
as built design,
execution design,
architecture,
mechanical installations,
tender design,
supervision.

Investor

Logarska dolina d.o.o.

Boiler room for district heating of tourist facilities and some residential houses on biomass boiler of 0.8 MW and a network length of ca. 1.7 km, which takes into account the latest environmental standards on emissions of major air pollutants. A new two-pipe hot water pipes for the transfer of heated water to compact heat stations to final users is connected with a modern system for dynamic optimization of heating operation. Estimated consumption of 800 MWh.
